

Protection visor for multiple use

- low cost
- ergonomical form
- light and comfortable
- does not burden the spinal column
- suitable for spectacle wearers
- prevents unconscious facial touches
- easy sighting exchange
- easy to disinfect
- high resistance to detergents

COMPLETE YOUR PROTECTIVE CLOTHING!

Droplet protection

Protect your employees and customers. Unlike conventional textile masks, no droplets can penetrate the visor material.

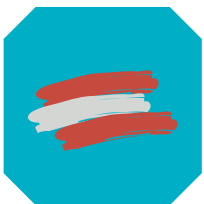

Sight exchange

Contact us for spare parts.

Eye protection

In contrast to standard masks, not only the mouth and nose area but the entire face is protected.

Produced in Austria

We attach great importance to regional production chains and their added value.

The Safety Visor protective visor is suitable as a complementary element of protective clothing, which can reduce the risk of droplet transmitted infections. It also protects the mucous membranes of lips, eyes and nose from contact with contaminated hands or objects and from minor mechanical injuries.

A flexible band ensures an individual adjustment to every head shape and guarantees optimal comfort. The buckle construction is made of Flexirene MS 20 A and complies with the rules and regulations of the European Union and other countries regarding the use of plastic materials in food contact environments.

Set includes:

- head clasp
- Visor film (Crystal clear, 175 µm, Antistatic)
- elastic band
- Foam inlay
